

Project Brief

Two Bridges in Sandy City

**2007 Legislative
Update**

Provided By:

Project Description: CONSTRUCTION, Bridge Replacement, Local Government

The purpose of this project is to improve safety for vehicles on two bridges located in Sandy at:

- (1) 8710 South over the Jordan & Salt Lake Canal
- (2) 8800 South over the East Jordan Canal

Multiple deficiencies indicating the need for replacement were identified on both structures during UDOT's biannual bridge inspection program. Heavy scaling, cracking and spalling, gouges and missing chunks in the concrete deck were found. The overall rating was poor leading to a recommendation of replacement instead of rehabilitation in the inspection report. The replacement bridges will be widened and the project includes design both of the bridges.

Due to funding limitations only the bridge at 8710 South over Jordan & Salt Lake Canal will be constructed with this project. Sandy City has agreed to seek an additional funding source to construct the other bridge at a later time.

**Commission
Approved
Project Budget:**
\$882,500

**Anticipated
Schedule:**
Construction –
February 2007
